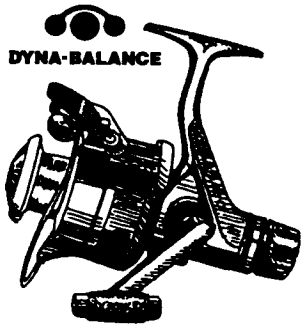
Shimano® has been the leader in spinning tackle for many years now. Our spinning reels have proven themselves to be no-risk purchases for consumers who know they can depend on reliable and smooth operation. This year we've expanded upon our solid base of manufacturing technology with a new concept called DynaBalance™. We're really pushing this innovation hard, not only in this manual, but also with advertising, our consumer catalog, and point of purchase displays. We're pushing so hard because we believe that DynaBalance™ is one of the best things to ever happen to spinning tackle.


The new Syncopate™ and the improved Sidestab™ with DynaBalance™ are some of the most exciting spinning reels to ever come along. These sporty, affordable reels give the everyday fisherman smoother retrieves than were available on any other reel, at any cost, just one year ago. Sidestab™ is available in three rear drag models. Syncopate™ is available in three front drag models. Both models come with an aluminum spool and an extra graphite spool.
